Assignment - I

Q1. Parkinson's Law - "Work expands to fill the time available for its completion."

Difficult Interpretation of Parkinson's Law:

- Software Development: The time taken to develop a software feature tends to expand up to the deadline, even if it will be done before. eg. if a developer is given two weeks for a feature, the work period will be the two weeks instead of being finished early.
- Code Complexity: The complexity of software grows to increase to fill the time and resources allocated to it. Sometimes, unnecessarily complex solutions.
- System Capacity: System capacity or network throughput gets filled up with data, processes, or users over time, utilizing all available resources.

11. Any Suggestions:

- Extra-curricular and non-academic activities have increased significantly in recent years, affecting students' study time.
- The Hindi Literature curriculum should incorporate works of Himachali writers and Pahari literature.
- Five days of the week should be strictly dedicated to teaching-learning activities to maintain academic quality. One designated day—preferably Saturday—may be reserved for all other activities.
- There is a need to appoint more faculty members in the Department of Commerce.
- Skill-based subjects should include practical experiments.
- The curriculum may be improved to enhance employability opportunities for students.
